##### ☐ Accumulation Criteria

- **Current Score  $\leq 5.0$  + Score Improvement  $\geq 2.5$ :** Build positions gradually

#### ☐ Transition-Based Exit Strategy

##### ☐ Defensive Sell Criteria

- **Current Score  $\geq 7.0$  + Next Score  $\leq 4.0$ :** Exit peak before crash
- **Score Decline  $\geq 3.0$  points:** High-conviction reduction phase
- **Final 25% of excellent periods:** Protect gains before reversal

##### ☐ Profit Taking Criteria

- **Current Score  $\geq 6.0$  + Score Decline  $\geq 2.0$ :** Partial position reduction
- **Transitioning from growth to decline:** Gradual profit realization
- **2-3 periods before major challenging cycles:** Strategic de-risking

#### ☐ Dynamic Portfolio Allocation

**COIN Allocation Strategy Based on Transition Analysis:**

Phase	Allocation	Criteria	Action
Pre-Surge	35-50%	Score improving 3.0+ points	Maximum accumulation
Growth	25-35%	Score 6.0-8.0, stable/improving	Hold core position
Peak	15-25%	Score 7.0+, deteriorating	Begin profit taking
Pre-Decline	5-15%	Score declining 2.0+ points	Defensive positioning
Bottom	20-30%	Score $\leq$ 4.0, improving ahead	Strategic re-entry

## ☐☐ Enhanced Risk Management

### Transition Risk Assessment

- **High Risk:** Score drops  $\geq 3.0$  points → Reduce exposure 50-75%
